

Innovations in Transplantation - Beginning of a New Era

02 25 26

BSRB Kahn Auditorium | 109 Zina Pitcher Place | Ann Arbor, MI 48109

Poster Session 12:15-12:45 p.m. | Symposium 12:45-5 p.m. | Reception 5-6:30 p.m.

This **FREE** symposium highlights current innovations in transplantation and the advances shaping its future. The session will focus on the innovations in artificial organs and xenotransplantation, policy changes in organ allocation, innovative surgical techniques, maximizing the use of donation after circulatory death using machine perfusion, pre-transplant cardiac evaluation and state of the art management of donor derived infections in solid organ transplant recipients.

Who Should Attend:

People within the transplant community including providers, professionals, and students.

Learning Objectives:

At the conclusion of this activity, participants will be able to:

- Critically assess new evidence.
- Evaluate when and how to incorporate emerging technologies and allocation policies into patient care.
- Apply best practices to optimize transplant outcomes.

Accreditation and Credits:

All accreditation and credit designation, as well as complete course schedule, can be found online.

Dr. Jayme Locke, MD, MPHProfessor of Surgery
Chief, Division of Transplantation
University of Alabama at Birmingham
Keynote Speaker
